

76. (Amended) The bipolar separator plate of claim 68, wherein the second porous, electrically conducting flowfield[s are] is metal mesh selected from titanium, stainless steel, aluminum, magnesium, and alloys thereof.

### REMARKS

The foregoing amendments are directed to providing clearer antecedent basis for the claims. In the event that any fees are necessary for entry of this amendment, please charge such fees against the undersigned attorney's deposit account 50-0714/LYNN/0020.

Respectfully submitted,
